DISCLAIMER

The main purpose of this section is to document to the prospective buyer how the DEXCO platform will work, to inform about our token and its utilities and our future plans as a team and platform.

This document is for informational purposes only and does not represent any kind of commitment on the part of the creators of DEXC and DEXCO Inc. about any current or future functionality of the token or the DEXCO platform documented in this document for informational purposes only.

We clarify that this document is not a financial advice and therefore the one who buys DEXC token will be aware and responsible for the risk of those gains or losses that may happen during the whole process of expansion of both the platform and the token. We also mention that as a team we will not refund any kind of purchase or reward for the loss of value of the token in case of dissatisfaction of the customer in such cases. As a company we will do our best for the proper functioning of the project, but we advise you not to buy DEXC token with funds that you cannot afford to lose. Customers who decide to buy DEXC will assume that the value may vary and therefore assume their risks.

By purchasing DEXC token the user understands that there will be no recourse whatsoever such as claims, actions or lawsuits against DEXCO Inc. in the event that the platform ceases to function for a variety of reasons or the DEXC token loses value for an infinite number of possibilities or even if the project does not reach its end. Faced with this type of product, as a company we strongly urge you before making any type of purchase, if you are unsure, to document yourself and contact a tax advisor who can guide you and/or manage a consistent purchase against your assets.

This token exists as a utility token of a decentralized platform so it does not represent an investment, there is no guarantee that DEXC will increase in value in the future nor that the user of the token is guaranteed any type of profit by purchasing DEXC token or using the DEXCO platform.

INTRODUCTION

DEXCO is a platform of a future crypto ecosystem that drives the functioning of the crypto economy and seeks recognition of tokens running on the Ethereum network (ERC-20) through our multifunctional platform.

With the passage of time the curiosity for the crypto world has become greater and greater, giving rise to a boom in cryptocurrency values never seen before.

There is a problem now, and it is that there is a great increase of interest and a certain complexity at the moment of entering this relatively "new" economy, and that is that users often have problems now of interacting with this new world. Terms such as exchange, decentralized wallets, or types of networks are words that are far from the knowledge of many. That is why our main goal is to put an end to this and give a little push to those new to the sector by providing them with a multifunctional platform where they can experience and learn about this economy, its operation, and its great possibilities in the same simple and practical environment.

We pretend to be a bridge to the knowledge of the ERC-20 network, the centralized and decentralized crypto economy and its functionalities in an intuitive and attractive way for crypto novices and professionals through our simple and straightforward interface. Thanks to our various current and future features we aim to ensure a solid project with real utilities.

The DEXCO ecosystem will be totally transparent since through our social networks and in our section "future investments" will be reflected everything that the team is doing as it progresses, thus, anyone who wants to be aware of the new actions of the project can be up to date. Clarify that this project will be forged thanks to our team and the community as it will be this who will be largely responsible for the evolution and direction of the project with the section of requests and votes where they can propose and promote through their contacts such request, thus obtaining the proposals with more popularity within the community. So we listen to you...

ECOSYSTEM

El principal objetivo de DEXCO es ser una plataforma libre y transparente para aquellos que la utilicen, obteniendo así, una herramienta para los usuarios totalmente segura y libre de promesas e ilusiones falsas.

Our main objective as a project is to forge a fully competitive ecosystem that allows us to exchange values, obtain benefits through our future staking method, grow together with the exchange of ideas from the community and much more. We want to position ourselves as one of the most widely used decentralized multifunctional platforms for users of the crypto economy. We intend to be a totally transparent tool and close to the investor to offer a fully interactive experience and where the user will be aware at all times of the future actions of the project.

As a project we know that in order to create value it is necessary to make ourselves known, that is why one of our main objectives will be the staging. To obtain a

competitive platform that generates movement around our token and/or other ERC-20 tokens, it is necessary to have people interested in the project and give a real use to the token. For this reason, as a company, we believe that the ideal place where it is easier to reach a certain audience with similar characteristics and / or specific interests are social networks, where much of our profits as a team will go effectively to attract new investors interested in our project, by other hand many of our future raffles going to be to promote us in social media.

La razón por la que citamos a la comunidad que habrá detrás de DEXC y DEXCO es porque como proyecto sabemos que un gran factor por el cuál un proyecto se expande y se convierte en un proyecto fiable y utilizado globalmente es debido a la confianza que obtiene el usuario, es por eso que la comunidad y nuestro equipo estará en constante contacto optimizando así ciertas necesidades de la plataforma y cumpliendo las peticiones más pedidas por la comunidad, cumpliendo así una total transparencia y buscando la satisfacción del poseedor de DEXC.

PLATFORM SECTIONS

RAFFLES

The DEXCO raffles are the easiest and most visual way to start learning token functions. This section will allow the DECO token holder to participate in different sweepstakes to get the opportunity to earn higher profits by exchanging DECO token for ticket/s.

Each draw will be predefined with the data where we will find how many prizes there are in that section and on the other hand the destination of those purchases with DECO token of non-winning users, in this way the token will be revalued as some destinations will be the burning of these, new draws with larger prizes, Airdrop's aimed at the community or for an exclusive use for the global expansion of the token. As a rule, the draws will have a duration of one week. In this week there will be a time for the entry into the draw, a certain time for the verification of the proper functioning and purchase of tickets and finally, the final outcome: the winner's section.

PETITIONS

RESUME

This section is one of the simplest but most important that the DEXCO ecosystem will have. This section will be a method that will facilitate the interaction between team and community and will give way to the intervention and decision to take actions by users that will impact the DEXCO ecosystem, i.e., they will have the ability to make decisions both on the DEXCO platform and direct actions on the DEXC token.

HOW IT WORKS

The requests will be requested and processed through our platform where anyone can suggest an idea if they are willing to exchange a symbolic DEXC value in exchange for research on their suggestion. It should be noted that not all requests will be finalized, as the team will try to choose the most coherent requests that will improve the users and the proper functioning of the ecosystem.

Once a suggestion has passed the requirements demanded by the team and is accepted, we will look for the ideal moment to establish it in the section where any user connected with their decentralized wallet will be able to vote and add their grain of sand to suggest come true.

Each suggestion will have a minimum number of votes for it to be carried out and this will be determined by the number of token holders and by the importance of the suggestion at that moment.

CONQUERORS

This section will be one of the most important sections where users and token holders will be able to increase their benefits by working together with us to expand the project.

In this section the "conquerors" will be those users who want to join the project expansion group and who help to spread the word about DEXCO and its native token in exchange for a return in DECO value. This section will be limited to a number of people who will be able to accept weekly missions in exchange for important rewards.

The aim of this action is to raise awareness of the project through the exchange of ideas user-user who could facilitate the ability to bring our project to all parts of the

world with the cooperation of those who want to promote our ecosystem and forge a large community with the same goal.

TOKEN & UTILITIES

DECO is a utility token within the multifunctional DEXCO platform that works on the ethereum network (ERC-20). It will be responsible for powering the platform and will be used to interact with it through the different existing utilities. The maximum supply of DECO is 400,000,000 DECO and it will not be possible to increase this number, on the other hand it will be possible to reduce the total number of tokens (token burning).

DECO main objective is to be the utility token of the multifunctional platform and future decentralized platform, thus achieving enrichment utilities with the future "earn" section, participate in own raffles and as a great novelty will be the use of DECO token for the operation of our launching platform that will serve for those tokens that want to have their own raffle on our platform with the aim of making us known and favoring other tokens (ERC-20) that want to collaborate.

TOKEN ALLOCATION (Explained)

ALLOCATION	%	Quantity
Market	70	280,000,000
Team	8	32,000,000
Strategy	14	56,000,000
Reserves	4	16,000,000
Advisors	4	16,000,000

Market:

70% (280,000,000 DECO) of the total supply goes to the open market which will start with a circulating supply of ~20% of the total (~80,000,000 DECO). As demand increases, more will be introduced until reaching the expected total on a regular basis through new enlistments in the Exchange and supplying more tokens to the platforms that act with our currency. During this process, tokens may be burned to improve the performance and value of the token.

Team:

8% (32,000,000 DECO) of the total supply goes to this group for the purpose of financing new projects within the DEXCO ecosystem, with the objective of improving work areas, devices, hiring new qualified workers and our own expansion campaigns.

Strategy:

14% (56,000,000 DECO) is directed to the strategy to expand the DEXCO ecosystem. Thanks to this percentage our team will have the necessary tools to create content and engage new users. The strategies will be exclusively and solely used to increase the value of both DEXC and DEXCO. We will see from advertising through all types of social networks to agreements with other sources that facilitate our improvement and knowledge.

Reserves:

This section contains **4% (16,000,000 DECO)** and will be destined to our reserves as a platform that will serve either to reward users with airdrops or to face certain possible incidences that may occur.

Advisors:

This section contains **4%** (**16,000,000 DECO**) and will be used exclusively to attract companies or people who want to cooperate with us and enhance our possibilities and improve our ecosystem. In such a competitive and dynamic world, it is essential to be well connected to other projects with a future and to be informed at all times of new opportunities to offer.

our platform will not ask for any kind of commission for its main functions. We want to achieve a welfare system for everyone.

thanks to our hosting provider our website will be secure for the proper functioning of the site and for an effective user experience.
