DECO TOKEN WHITE PAPER

Last update April 24th, 2022

INDEX

DISCLAIMER

The main purpose of this section is to document the prospective buyer how the DEXCO platform will work, to inform about our token, it´s utilities and our future plans as a team.

This document is for informative purposes only and does not represent any kind of commitment on the part of the creators of DECO token and DEXCO Inc. of any current or future functionality of the token or the DEXCO platform here described.

We would like to clarify that this document is not financial advice and therefore any buyer of the DECO token will be aware and responsible for the risk of those gains or losses that may occur during the whole process of expansion of both the platform and the token. DEXCO, Inc and/or it´s members will not refund any purchase or reward in any way for any reason and will not be held responsible for any loss or costumer dissatisfaction. As creators of the platform and it´s token we will do our best for the proper functioning of the project, but we advise you not to buy DECO token with funds that you cannot afford to lose. DECO buyers understand that the value varies and therefore assume the risks.

By purchasing DECO token, the user understands that there will be no recourse whatsoever such as claims, actions or lawsuits against DEXCO Inc. in the event that the platform ceases to function for a variety of reasons, or the DECO token loses value for an infinite number of motives or even if the project does not reach its goal. Faced with this type of product, as a company, we strongly urge you before making any

type of purchase, if you are unsure, document yourself and contact a financial advisor who can guide you and/or manage a consistent purchase against your assets.

This token exists as a utility token of a decentralized platform so it does not represent an investment, there is no guarantee that DECO will increase in value in the future nor that the user of the token is guaranteed any type of profit by purchasing DECO token or using the DEXCO platform.

INTRODUCTION

DEXCO is a platform of a future crypto ecosystem that seeks to divulge the functioning of the crypto economy and the tokens running on the Ethereum network (ERC-20) through.

As time goes by the interest for the crypto world has become greater, giving an exponential rise of cryptocurrency values never seen before.

There´s a great increase of interest and a certain complexity at the moment of entering this relatively "new" economy, users often have problems interacting with this new world. Terms such as exchange, decentralized wallets, or the different types of networks are words that are far from the knowledge of many. That is why our main goal is to put an end to this and give a little push to those new to the sector by providing them with a multifunctional platform where they can experience and learn about this economy, it´s operation, and it´s great possibilities in the same simple and practical environment.

We want to be a bridge to the knowledge of the ERC-20 network, the centralized and decentralized crypto economy and its functionalities in an intuitive and attractive way for crypto novices and professionals through our simple and straightforward interface. Thanks to our various current and future features we aim to ensure a solid project with real utilities.

The DEXCO ecosystem will be totally transparent through our social network and in our section "future investments". will reflect everything that the team is doing as it progresses, anyone who wants to be aware of the project new actions, can be up to date. This project will be forged thanks to our team and the community as it will be these who will be largely responsible for the evolution and direction of the project with the section "Petitions" where they can propose and promote through their contacts all kind of ideas.

ECOSYSTEM

The main objective of DEXCO is to be a free and transparent platform, a tool that is totally safe. We project to forge a fully competitive ecosystem that allows us to exchange values, obtain benefits through our future staking method, grow together with the exchange of ideas from the community and much more. We want to position ourselves as one of the most widely used decentralized multifunctional platforms for users of the crypto economy. We intend to be a totally transparent tool and close to our investors, offer a fully interactive experience where the user will be aware at all times of the future actions of the project.

In order to create value, it is necessary to make ourselves known, that is why one of our main objectives will be making our platform visible. To obtain a competitive scenario that generates movement around our token and/or other ERC-20 tokens, it is necessary to create interest in the project and give a real use to the token. For this reason, we believe that the ideal place where it´s easier to reach a certain audience with similar characteristics and /or specific interests are social networks, where much of the profits as a team will go effectively to attract new investors interested in our

project, on the other hand, many of our future raffles will be directed to promote us on social media.

The reason why we mention the community that will be behind DECO and DEXCO is because we know that a major factor by which a project expands and becomes reliable and globally used project is due to trust, that is why the community and our team will be in constant contact optimizing certain needs of the platform and fulfilling the most requested proposals by the community, seeking the satisfaction of the DECO holder.

PLATFORM SECTIONS

RAFFLES

The DEXCO raffles are the easiest and most visual way to start learning token functions. This section will allow the DECO token holder to participate in different sweepstakes getting the opportunity to earn higher profits by exchanging DECO token for tickets.

 We will find out how many prizes are in each section and the destination of those non-winning purchases with DECO token, this way the token will be revalued as some destinations will be the burning of these, new draws with larger prizes, Airdrop's aimed at the community or for an exclusive use for the global expansion of the token.

The draws will have a duration of one week. There will be certain time for the verification of the proper functioning and purchase of tickets and the final outcome: the winner's section.

PETITIONS

This section is one of the simplest but most important that the DEXCO ecosystem will have. This section will facilitate the interaction between our team and the community, it will give a path for users to intervene an take actions that will impact the DEXCO ecosystem, i.e., they will have the ability to present their proposals both on the DEXCO platform and on the DECO token.

The requests will be processed through our platform where any user can suggest an idea if they are willing to exchange a DEXC value in exchange for research on their suggestions. It should be noted that not all requests will be finalized, as the team will choose the most coherent requests that will improve the user experience and the proper functioning of the ecosystem.

Once a suggestion has passed the requirements demanded by the team and has been accepted, we will look for the ideal moment to establish it in the proper section where any user connected with their decentralized wallet will be able to vote and add their thoughts.

Each suggestion will have to have a minimum number of votes for it to be carried out and this will be determined by the number of token holders and by the importance of the suggestion at that moment.

CONQUERORS

This section is where users and token holders will be able to increase their benefits by working together with us to expand the project.

In this section the "conquerors" will be those users who want to join the project expansion group and who will help to spread the word about DEXCO and its native token in exchange for a return in DECO token. This section will be limited to a number of users who will be able to accept weekly missions in exchange of rewards.

The aim of this action is to raise awareness of the project through the exchange of ideas. encourage the necessary actions to take our project to all parts of the world with the support of those who would like to promote our ecosystem and forge a large community with the same goal.

<u>**TOKEN**</u>

DECO is a utility token within the multifunctional DEXCO platform that works on the Ethereum network (ERC-20). It will be responsible for powering the platform and will be used to interact with it through the different existing utilities. The maximum supply of our token is 400,000,000 DECO and it will not be possible to increase this number, but it could be susceptible to be reduced (token burning).

TOKEN ALLOCATION (Explained)

ALLOCATION	%	Quantity
Market	70	280,000,000
Team	8	32,000,000
Strategy	14	56,000,000
Reserves	4	16,000,000
Advisors	4	16,000,000

Market:

70% (280,000,000 DECO) of the total supply goes to the open market which will start with a circulating supply of ~20% of the total (~80,000,000 DECO). As demand increases, on a regular basis, more will be introduced reaching the expected total through new enlistments in the Exchange and providing more tokens to the platforms that interact with our currency. During this process, tokens may be burned to improve the performance and value of the token.

Team:

8% (32,000,000 DECO) of the total supply goes to this group for the purposes of financing new projects within the DEXCO ecosystem, improving work areas, devices, hiring staff and expansion campaigns.

Strategy:

14% (56,000,000 DECO) is directed towards the expansion strategy of the DEXCO ecosystem. Thanks to this percentage our team will have the necessary tools to create content and engage new users. The strategies will be exclusively and solely

used to increase the value of both DEXC and DEXCO. will advertise through all types of social networks, implement agreements with other sources that facilitate our improvement and knowledge.

Reserves:

This section contains 4% (16,000,000 DECO) and will be the platform reserves that will serve either to reward users with airdrops, to face certain possible incidences that may occur or simply to improve our ecosystem.

Advisors:

This section contains 4% (16,000,000 DECO) and will be used to attract companies and people related to this world who want to cooperate with us to enhance our possibilities and improve our ecosystem. In such a competitive and dynamic world, it's essential to build connections to other projects and to be informed at all times of new opportunities offered.
